

Keyplast Cross Reference to Macrolex Dyes

Plastic processors and color compounders are always looking for alternative sources for the colors they use. It's important that these sources match the current standard and quality for use in existing formulations. For decades customers throughout the world have looked to Keystone Aniline Corporation for these colorants and now find us as their primary supplier of quality dyes for polymers. Below is a list of Keyplast dyes and the Color Index cross reference to commonly known Macrolex dyes. In most cases you will find they are a direct drop in to the Macrolex version, however, due to circumstances beyond our control we always recommend testing in your application. For more detailed information on Keyplast colorants for polymers, contact Keystone Aniline Corporation.
