

KEYPLAST™ Pigments for Plastics

Keystone Aniline Corporation is pleased to announce the expansion of our line of pigments for plastics and polymers. It includes some of the classical pigments along with a selected group of High Performance pigments. This list represents our active pigment product line, however if you have a need for a pigment not listed, please contact your local Sales Representative for further information. Keystone Aniline Corporation recommends testing in your system, and under your conditions, as variables beyond our control prevent us from guaranteeing results.
